**PRN** E005214 **NAME** Garn Goch Industrial Estate, Swansea **NGR** SS6059598156 **COMMUNITY** Penllergaer  
**TYPE** EVALUATION **YEAR** 2004 **ORGANISATION** GGAT **PERSON** Sherman, A.  
**SUMMARY** A field evaluation at Garn Goch industrial estate found no evidence of further archaeological resources.

**DESCRIPTION** GGAT was commissioned by Swansea Council to evaluate land south of Phoenix Way prior to determination of planning permission for development on Garn Goch Industrial Estate. The land is tangential to the Garn Goch Bronze Age Cairn (00379w), a Scheduled Monument. Results suggest there is no prehistoric activity other than the cairn itself within the development site, though the presence of peat beds may yield valuable environmental evidence, and the possibility of flint scatters close to the cairn could not be dismissed. GGAT recommended that the view of the monument from Hospital Rd not be impeded, given that such views were ever important, and that measures be taken to protect the historical setting of the monument. (Sherman, A, 2004)

**PRN** E005431 **NAME** *The Rural Settlement of Roman Britain* **NGR** SS5858587907 **COMMUNITY** Bishopston  
**TYPE** PROJECT **YEAR** 2015 **ORGANISATION** University of Reading **PERSON** Allen, M et al  
**SUMMARY** *The Rural Settlement of Roman Britain project was undertaken by Reading University and Cotswold Archaeology, on behalf of Historic England and the Leverhulme Trust, with the aim of creating a resource that brings together the excavated evidence for the rural settlement of Roman Britain with the over-arching aim to inform a comprehensive reassessment of the countryside of Roman Britain.*

**DESCRIPTION** *The Rural Settlement of Roman Britain project was undertaken by Reading University and Cotswold Archaeology, on behalf of Historic England and the Leverhulme Trust, with the aim of creating a resource that brings together the excavated evidence for the rural settlement of Roman Britain with the over-arching aim to inform a comprehensive reassessment of the countryside of Roman Britain. It includes both traditionally published reports and 'grey literature' reports from developer-funded excavations since 1990. With the inclusion of the Welsh settlement data in 2015 to complement that from England, the project includes some 3600 records of rural sites, accounting for c. 2500 individual settlements, the vast majority of which were reported on since the implementation of PPG 16 in 1990. However the project has reached back and includes some sites published as early as 1808. Each site is described with bibliographic entries, as well as information on chronology, settlement type, morphological form and associated material culture and environmental data. The project has not included all investigations, such as watching briefs and small-scale evaluations producing Roman evidence, but has limited its scope to those that have yielded plan, chronology and quantified finds data susceptible of characterisation and synthesis. The cut-off for inclusion here is publication before 31st December 2014 for sites in England and March 2015 for sites in Wales (Allen et al 2015).*
