

CASTELL CWM-WYNTYLL, Trecwm, Pembrokeshire

(SM 9645 3113; SAM: PE141; NPRN 305189)

sections of later hedge banks at i, ii & iii follow the line of, and appear to fossilise, the inner bank of the enclosure.

the remains of the field banks in this area form the arrangement as depicted on the 1st Edition Ordnance Survey of 1889. The one possibly earlier feature is the section of bank at iv.
